## Fourier Series

1. For the following signal:

a) Find the Fourier series
b) Plot the spectra versus frequency, $\omega=n \omega_{0}$.
2. Repeat problem 1 for the following signal:

3. Compute the Fourier series for the following signals:
a) $\mathrm{x}(\mathrm{t})=2+4 \cos (50 \mathrm{t}+\pi / 2)+12 \cos (100 \mathrm{t}-\pi / 3)$
b) $\mathrm{x}(\mathrm{t})=4 \cos (2 \pi(1000) \mathrm{t}) \cos (2 \pi 750000 \mathrm{t})$
c)

d)

4. For the signals given in Problem 3c) and 3 d ), use Matlab to plot the truncated Fourier series for $\mathrm{N}=3$, $\mathrm{N}=10$ and $\mathrm{N}=40$. (Use subplot to save paper).
5. Find the Fourier series for the following signal. Also, sketch the approximation if a large number of terms are kept in the series (say $\mathrm{N}=30$ ).
